

Appl. No. 10/699,617  
Response dated August 29, 2005  
Reply to Office action of May 27, 2005

In the specification:

Applicants repeat here the amendment to the abstract that  
was submitted in the previous response to office action, but  
which appears to have been overlooked.

Page 15, lines 2-6, please amend the paragraph as follows:

A digital toner/locator employs tone packets using a 455Khz carrier. Plural packet quanta provide multiple test modes which are advantageously selected from a probe without requiring returning to the tone generator to change mode. A locate and isolate mode are provided, as well as multiple song selection, for choice of alternative songs played by the detector when the tone packets are detected.
